

evidence and in vogue in this Legislature but there are going to be other propositions you all are going to bring up to show that you are all hypocrites on the way you are voting on these matters here. You are going to give similar appeals to mine for those things you think are worth something even though it is going to cost the state money. You are going to be an advocate for those groups who have the money and who can contribute to your campaigns. Senator DeCamp will carry bills for various special interest groups and they contribute handsomely to his political campaigns. There are other people in this body who carry water for various interest groups, and if you look at their accountability statements, you see how they are rewarded for that. Then you are going to sit up here and vote to kill these types of commissions where the amount of money is not really that great. If you allowed these commissions, and I have to use the words "allowed" because you are the white master, you are in the saddle, you are in control now just as you have always been, but you are stripping away the pretense now of having any concern or any compassion and you are showing where your real attitudes are, and I am not forgetting those who had what it took to vote to try to do something decent, so my words are not going to those who try to maintain at least a veneer of decency in this state. The 26 prevailed. The 26 did a great thing for white supremacy but sometimes when I listen to the way positions are advocated on this floor, I have to say that the ability displayed is detrimental to the cause of white supremacy because I don't see that real supremacy. You know where that supremacy inheres? In your numbers. You outnumber people and you are able to crush them down. What you don't understand is that there are representatives of nonwhite groups in this Capitol and who work for this state and they understand what it is I am talking about. They hear the racial jokes, the slurs, the remarks made about women and to women. They know the contemptible activity engaged in by some of the people who are on the floor of this Legislature, so the vote that was just given merely strips away the need for any of us to pretend that there is civility here. You can do it with a vote and you can hide behind it and you don't have to stand here and speak openly and let your position be known. The anonymity of a vote, and you are saving a package, you say, that means so much. That is tripe. It is a good thing that the people who live in the district that I represent sent somebody like me to this Legislature. Nobody else could survive. I see white people
